

How To: Use the Pioneer AVR Sound System Connected to Samsung TV

The last thing you want to do while on vacation is spend more time troubleshooting a complicated device than relaxing. Unfortunately, the AVR (Audio/Video Receiver) sound system and Samsung TV are two such devices. However, this guide will help you navigate the system so you can fully enjoy your stay!

Overview

This guide explains how to control the AVR sound system simultaneously with the Samsung TV.

The AVR sound system controls the sound all throughout the rec room and operates as a built-in speaker system for music, television, radio, and more.

Before you start

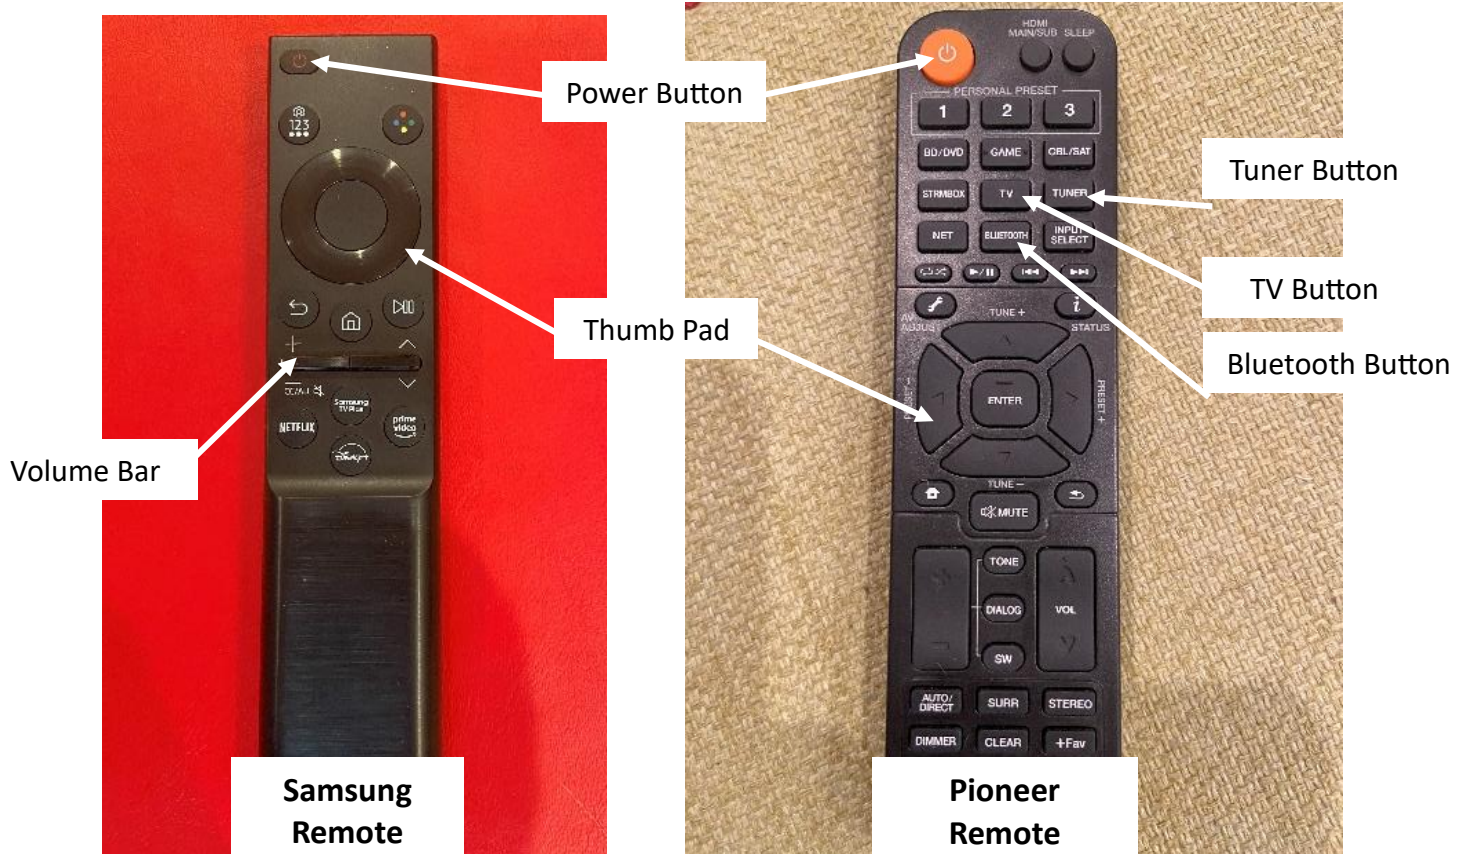

Where exactly *is* the AVR sound system? What does it look like?

The AVR system is located in the rec room adjacent to the main living space on the third floor. In the room, you can find the system to the left of the fireplace below the countertop in a stereo cabinet.

Keep in mind: There are two remotes. The Samsung remote controls the TV while the Pioneer remote controls the AVR system. The Pioneer remote has eight input options. Please disregard the BD/DVD, CBL/SAT, STRMBOX, and NET options. They are not needed for the operations in this guide.

Section 1: Using the AVR Sound System for TV

Step 1: Turning on the TV

1. Locate the Samsung remote.
 2. Point the remote at the TV.
 3. Press the power button on the remote once.
 - Please allow **30 seconds** for the TV to boot up. The first thing you will see is a scrollable list of streaming services.
 4. Click the right or left side of the thumb pad to scroll through the streaming services.
 5. Select a streaming service by clicking the middle button on the thumb pad.
 - For local channels, such as ABC and NBC, select Spectrum.
- If the AVR sound system turns on automatically when you turn the TV on, disregard Step 2.

Step 2: Turning On or Off AVR for TV

There are two ways to turn on or off the AVR.

Way 1:

1. Locate the power button on the bottom left-hand side of the AVR box.
2. Press the power button on the box once.
 - Please allow **10 seconds** for the system to boot up. The button should turn blue when turned on.

Way 2:

1. Locate the Pioneer remote.
2. Point the remote at the AVR box.
3. Press the power button on the remote once.
 - Please allow **10 seconds** for the system to boot up.

When both the TV and AVR are turned on, you can redirect TV sound to the surround sound AVR speakers.

1. Point the Pioneer remote at the AVR box.
2. Locate and press the “TV” button on the remote once.
 - Once selected, the TV sound will redirect to the surround sound speakers.

Step 3: Controlling Volume

When sound has been redirected to the AVR system, the Pioneer remote is no longer needed. The Samsung remote controls surround sound volume. The Samsung remote also controls sound volume when the AVR system is not connected to the TV.

1. Locate the Samsung remote.
2. Point the remote at the TV.
3. Locate the volume bar with the plus and minus symbols on the remote.
4. Click the bar towards the plus to increase volume and down towards the minus to decrease volume.

Disconnecting for TV Sound

If you would prefer to enjoy TV with the AVR, simply follow **Step 2** listed above.

Section 2: Using the AVR Sound System for Radio

To turn on the AVR sound system, see **Section 1 Step 2** for more details. From there, you can access the radio on the AVR using the Pioneer remote.

1. Locate the Pioneer remote.
2. Point the remote at the AVR box.
3. Locate and press the “Tuner” button on the remote once.
4. Click the up or down button on the thumb pad to change the radio station.
 - The radio station number will be displayed on the AVR box.

! Keep in mind: If the TV is on when radio or Bluetooth are selected for the AVR, TV sound will be muted. You **CANNOT** play TV sound when AVR is in use for radio or Bluetooth. For Bluetooth connection, see **Section 3**.

Section 3: Using the AVR Sound System for Bluetooth

To turn on the AVR sound system, see **Section 1 Step 2** for more details. From there, you can access Bluetooth on the AVR by first using your phone.

1. Open your mobile device.
 - ! Keep in mind:** This section is specific to iPhones.
2. Open the Settings app.
3. Select the “Bluetooth” option on the main screen.
 - It should open to a different screen with a list of available Bluetooth connections.
4. Locate the Pioneer remote.
5. Point the remote at the AVR box.
6. Locate and press the “Bluetooth” button on the remote once.
7. Locate your phone.
8. Under the Bluetooth section, wait a moment for “Pioneer VSX” to appear under the “Other Devices” section.
9. Once it appears, select it and wait for the device to say “Connected” on the righthand side of the screen.

Now, you’re set up to stream music from your phone!
